

Figure 8

Outasight

Caught the train on the later side
Looking for a place with a little bit of life
Been a tough week, can't deny that I thought about stopping
More than once or twice, oh no, some more advice
Keep your head up while you're pushed to the side
And maybe with a bit-bit more luck
You can get picked up from wherever you lie
I know, I know it's not enough, you know, you know it's hard enough
To get a decent chance around these parts-around these parts
I know, I know it's not enough, you know, you know it's far enough
That you can't get there on your own anymore

Lately, I've been trying my best
But maybe it ain't good enough
Running in circles I guess, round and round, it never stops
It never stops, it never stops, it never stops just like a figure 8
It never stops, it never stops, it never stops just like a figure 8

Hailed a cab on the early side, looking for a train to get uptown
Uh, think I wanna see home, don't pick up the phone
Can't hear a sound, search our whole lives up and down
For what can't be found instead of appreciating of what we have around
Or what we have now gets tossed to the ground
I know, I know it's not enough, you know, you know it's hard enough
To get a decent chance around these parts-around these parts
I know, I know it's not enough, you know, you know it's far enough
That you can't get there on your own anymore

Lately, I've been trying my best
But maybe it ain't good enough
Running in circles I guess, round and round, it never stops
It never stops, it never stops, it never stops just like a figure 8
It never stops, it never stops, it never stops just like a figure 8
It never stops, it never stops, it never stops just like a figure 8
It never stops, it never stops, it never stops just like a figure 8
