

# Future

## Mindless Behavior

[Intro]

Hey Girl

Now you rockin with MB girl  
(You didn't know?)

[Verse 1]

Wish I could drive a whip, and take you 'round the city  
Cruise around the strip, and pick up something pretty for you  
Wish I could ball out in the club and the nightlife ya heard me  
But that might be just a little too early  
Instead of shoppin malls, take you to the Taj Mahal  
Maybe the islands, only the finest for you (yes)  
I know I'm young but I ain't even tryna fool ya (no)  
What I'm sayin is that

[Hook]

Girl I gotta future, I got a future  
And when I'm older I'mma know just what to do witcha  
Because the future's lookin' bright so come into the light  
And everything that's wrong I'll make it right  
Cause girl I got a future, Girl I got a future  
Girl you know I got a future, future, future, girl I gotta future, yeah

[Verse 2]

Wish I could meet your moms, and show her that I'm decent  
Wish that I could tell you that I love you girl I mean it I do  
Wish I can kick it with your friends on a regular basis  
But we're from two different worlds, I gotta face it  
I'm still a boy and, you need a real man  
I'm gonna get there, yeah I know I sure can (yes)  
I know I'm young but I ain't even tryna fool ya (no)  
What I'm sayin is that

[Hook]

Girl I gotta future, I got a future  
And when I'm older I'mma know just what to do witcha  
Because the future's lookin' bright so come into the light  
And everything that's wrong I'll make it right  
Cause girl I got a future, Girl I got a future

Girl you know I got a future, future, future, girl I gotta future, yeah

[Verse 3]

One day, I'll be older and wiser (yeah)  
One day, I'll be somebody's provider yeah  
One day, Yeah I'm gonna be able to do  
All of the little things that I been singin' to you  
And one day, I'll be ballin', drivin' 'stead of walkin'  
Take you where you want and take you shoppin' in the mall and  
Whoo!  
I know I'm young but I ain't even tryna fool ya  
What I'm sayin' is that

[Hook]

Girl I gotta future, I got a future
