

All the Way

Strange Fruit Project

We will give you what we came to give you
Where we gonna take you
To another place where we can elevate your mind
All The Way
Girl I'm gonna make you hit your soul
And make you feel it
Take you all the way inside
Baby
All The Way
Make you move it
Make you feel it
Put your hands up in the air
And let your troubles go away
We're gonna make you feel real good inside

Ay yo, everything is everything
Love is the light of my heart
Get rid of the heavy thing
I will forever sing
Forever will bring
And never come between
The terror of life and better things
This is my medique
That lifts off the scene from
Music is my everything
We enter my kingdom
God bless

We will give you what we came to give you
Where we gonna take you to another place where we can elevate your mind
All The Way
Girl I'm gonna make you hit your soul and make you feel it
Take you all the way inside
Baby
All The Way
Make you move it
Make you feel it
Put your hands up in the air
And let your troubles go away

We're gonna make you feel real good inside

Yo, feel on this

I want to be free

How free?

Ay yo, free as can be

I want to walk the streets without all the jealousy

So what you're selling me?

Pennies for my thoughts?

Dimes for the stress?

Incense to relax this pain up in my chest?

Bless your soul

I've seen it all kid

Generation after generation we continue to fall

Give me a call if you want to talk

We're like brothers, kid

Let's build

And continue to live

All the way

All the way

All the way

All the way

Yo

This is the song of inspiration

For the many who have not experienced the ups and downs what is life and love

So many choices we can make

But what you need to do is take your time

And figure A through D

Or all of the above

To some my diction may sound foreign

No, I hope I ain't borin'

What I'm trying to do is fit your mental like a glove

In hopes that you might understand

That joy and pain go hand-in-hand

Until demandin' 'spect

When pushing comes down to a shove

So on this day

It's for you that I pray

That you will listen with you heart

And cast away the things that you have heard

So on this day

It's for you that I pray

That you will listen to my own

And hear a soul instead of just my words

Instead of just my words

Instead of just my words

All the time

We will give you what we came to give you
Where we gonna take you to another place where we can elevate your mind

All The Way

Girl I'm gonna make you hit your soul and make you feel it
Take you all the way inside

Baby

All The Way

Make you move it

Make you feel it

Put your hands up in the air
And let your troubles go away

We're gonna make you feel real good inside
