

# Get It Together

## Seal

Now's the time for stepping out of place  
Get up on your feet and give account of your faith  
Pray to God or something or whatever you do  
What I see can make me stop and stare  
But who am I to judge the color of your hair  
Surely all you're feeling much the same as I do

We got to keep this world together  
Got to keep it moving straight  
Love like we mean forever  
So that people can relate  
If you're rolling to your left  
Don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might

(We gotta do something  
We gotta do something  
We gotta do something)

Thinking of the troubles of today  
Is it easier to put that gun away  
Or is it difficult to stop the world to show you care?  
Everything and everyone we know is beautiful  
Surely you will be the guide in light to save us all  
Maybe we can be the vision of a prophet man's dream

'Cause we've got to keep this world together  
Got to keep it moving straight  
Love like we mean forever  
So that people can relate  
If you're rolling to your left  
Don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might

(I have something, do you have something  
'cause I have something for you)  
(I have something, do you have something  
'cause I have something for you)

(I have something, do you have something  
'cause I have something for you)  
(I have something for you)

We got to keep this world together  
Got to keep it moving straight  
Love like we mean forever  
So that people can relate  
If you're rolling to your left  
Don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might

We got to keep this world together  
Got to keep it moving straight  
Love like we need each other  
So that people can relate  
If you're rolling to your left  
Don't forget I'm on the right  
Trust and forgive each other  
A little love and we just might
