

Triage

Veruca Salt

It's now or never, whether we try
I can't remember why And I can't believe that you were together
I don't believe you let her inside
I can't believe she wrote me the letter
Why did you bother to leave me alive Alive and ticking inside We said forever, until we die
But we're all offenders
We all lie I can't believe that you were together
I don't believe you let her inside
I can't believe she wrote me the letter
Why did you bother to leave me alive Alive and ticking inside
I don't believe that you were together
I can't believe you let her inside
I don't believe she wrote me the letter
Why did you bother to leave me alive...
