

Moonshine (feat. Akon)

Savage

I can't go nowhere unless you're by my side
I gotta have you here, I said right here by my side
I can't roam the town unless you're by my side
I gotta have you around, right here by my side So where's my moonshine?
'Cause I be all up in the club with you, yeah
So where's my moonshine?
You know I spend my last dub for you, yeah So where's my moonshine?
Well, it feels so nice with you, yeah
So where's my moonshine?
Wanna spend my whole life with you, yeah I snuck into this club when I was fifteen
And I met my girl at the bar, such a sweet thing
Every time I held her she would always kiss me
Every touch of her lips would always make me tipsy
I told her man, I love you, pulled her to the dance floor
And that's when she whispered be careful what you ask for
Grabbed her by the waist and I sat her on the table
Explained how her heartburn, she's givin' me is painful And now you wanna leave 'cause you
feel empty inside
But none of my friends trust me with you to drive
I'm so into you I hope you feeling it
Man, I need you in my life and the reason is I can't go nowhere unless you're by my side
I gotta have you here, I said right here by my side
I can't roam the town unless you're by my side
I gotta have you around, right here by my side, so How many times I gotta tell you what you
stressing me for
Yeah I see you need attention I ain't tryin' to ignore
I gotta straighten up now I got work to do
You want me to drop everything so it surrounds you
Man, I love you so much it makes me sick to my stomach
And I love it how I can vomit and you think nothing of it
I never meant to argue with you, please forgive
Girl I need you in my life and the reason is I can't go nowhere unless you're by my side
I gotta have you here, I said right here by my side
I can't roam the town unless you're by my side
I gotta have you around, right here by my side, so You see my moonshine she keeps me warm
when it rains
I forget my problems when she eases the pain
And my friends keep telling me to call it a day
She don't love you Savage, it's all in your brain See I don't believe a word that you say to my
face
I'm in love and I know she feels the same
I'll buy you all the ice you want and I'll keep you safe

Man I love my alcohol, what more can I say
I can't go nowhere unless you're by my side
I gotta have you here, I said right here by my side
I can't roam the town unless you're by my side
I gotta have you around, right here by my side
So where's my moonshine?
'Cause I be all up in the club with you, yeah
So where's my moonshine?
You know I spend my last dub for you, yeah
So where's my moonshine?
Well, it feels so nice with you, yeah
So where's my moonshine?
