

# Sunscreen

## Half an Orange

[Verse 1]

I think it was a Honda  
A '99 that we'd drive and play Nirvana  
It never started right away it didn't wanna  
Let me get too far from here

[Chorus]

I was still too young to realize  
That these summertime drives  
They don't last your whole lifetime  
I think it was a Honda  
I run another light to get through the night  
Scared as shit, but I know that I'm alright  
We were 17, pure like kerosene  
You protected me you were my sunscreen  
You protected me you were my sunscreen

[Verse 2]

I'm running out of karma  
I don't think that I'll make it any longer

Though with you by my side, I feel stronger  
Than I've ever been before  
(Ever been before, ever been before)

[Chorus]

I was still too young to realise  
That these summertime drives  
They don't last your whole lifetime  
I think it was a Honda  
I run another light to get through the night  
Scared as shit but I know that I'm alright  
We were seventeen pure like kerosene  
You protected me you were my sunscreen  
I run another light to get through the night  
Scared as shit but I know that I'm alright  
We were seventeen pure like kerosene  
You protected me you were my sunscreen  
You protected me you were my sunscreen

[Verse 3]

I'm running out of karma  
I don't think that I'll make it any longer  
Though with you by my side I feel stronger  
Than I've ever been before

(Ever been before, ever been before)

[Outro]

I'm running out of karma

I don't think that I'll make it any longer

Though with you by my side I feel stronger

Than I've ever been before

(Ever been before, ever been before)
