

# Up All Night

Beck

When you get the rhythm and words all make you cold  
When you break it down and this world is all you know  
Hands up, you're waving it around  
Now get yourself together  
When you count the dominos fall, it's time to go Now I'm feeling so far away  
I see the colors and all the kids going home  
Night is crawling into the day  
I hear my voice ringing  
The summertime's singing  
Just want to stay up all night with you  
Just want to stay up all night with you  
There's nothing that I wouldn't rather do  
Just want to stay up all night with you  
I'll keep it moving  
Don't wait for nothing now  
I gotta keep it moving  
Don't wait for nothing now  
I'll keep it moving  
Don't wait for nothing now  
I gotta keep it moving  
Don't wait for nothing now  
1,2, what you doing?  
I've been jumping through some hoops  
Want to get my body loose  
Want to tell you, tell you what to do  
I've been running on the grass like an animal struggling  
Looking for a diamond  
I'm trying, I'm fighting  
Back into the rhythm now  
I just want to stay up  
I just want to stay up all night with you  
With you, with you  
Just want to stay up all night with you  
Just want to stay up all night with you  
There's nothing that I wouldn't rather do  
Just want to stay up all night with you Hands up in the air  
If you don't really care  
Living on [?] there  
If you got the climb to take it up there Hands up in the air  
Living out on a prayer  
Never know that you're there

Nothing that I want but rather be there
