

Pain

Josh A

Pain goes by when you just don't think about

When you just don't think about it, no

Pain goes by when you just don't think about

When you just don't think about it, no

I think my vision's getting blurry, swear the reaper's in a hurry

Yeah I say I got no worries but feels nothing's gonna cure me

I don't really know why, been so damn sick of this ride

Just want off so I can feel normal for once

Fantasize about grippin' the gun

And I got lots of problems, medicated, solved 'em

Slowly I been falling, slowly I been falling

I got lots of problems, medicated, solved 'em

Slowly I been falling, slowly I been falling, no, no

Voices all, in my head, I don't want, no more drugs

Voices all, in my head, I don't want, no more

Pain goes by when you just don't think about

When you just don't think about it, no

Pain goes by when you just don't think about

When you just don't think about it, no

I've been living by myself, my parents saying find help

But therapy is kinda scary, yeah that's what my brain repelled

I've been living sedentary, driving past the cemetery

Couple feet right from my house, if that's the end then I want out

And I got lots of problems, medicated, solved 'em

Slowly I been falling, slowly I been falling

I got lots of problems, medicated, solved 'em

Slowly I been falling, slowly I been falling, no, no

Voices all, in my head, I don't want, no more drugs

Voices all, in my head, I don't want, no more

Pain goes by when you just don't think about

When you just don't think about it, no

Pain goes by when you just don't think about

When you just don't think about it, no

Can you save me

Can you save me

Can you save me

Can you save me
