

# Shine

## Meredith Brooks

Lucky that you found me  
You gotta hang around me some more  
Cause I'll remind you  
I'll be around  
While you're waging your war  
With yourself and I  
See it clearer than you can see it  
You gotta get out of your head to believe it  
Oh, I know something about you  
You don't know

That's where you shine  
When you're sinking you swim  
You can see your way out instead of in  
That's where you shine  
Like a diamond in the rough  
You're always so resilient  
That's where you shine  
When you're walking the edge  
No one's ever gonna catch you stumbling  
That's where you shine (shine)

Remember when told me  
To get up and dust your self off  
It wasn't easy  
Everything can change and it usually does  
It does, you said  
Shake it off like it ain't no big thing  
Won't be the last time we're sinking  
Oh, I know something about you  
You don't know

That's where you shine  
When you've think you had enough  
Just a matter of time before you fade  
That's where you shine  
Like a clear in the bush  
Like a headlight breaking through the haze  
That's where you shine  
When there's nothing but no

And there's no where to go you find away  
That's where you shine, shine

Sometimes you need someone to see yourself clearer  
There's no reflection when it's you inside the mirror

I know, something about you  
You don't know

That's where you shine  
When you're sinking you swim  
You can see your way out instead of in  
That's where you shine  
Like a diamond in the rough  
You're always so resilient  
That's where you shine  
When you're walking the edge  
No one's ever gonna catch you stumbling  
That's where you shine, shine

That's where you shine  
When you've think you had enough  
Just a matter of time before you fade  
That's where you shine  
Like a clear in the bush  
Like a headlight breaking through the haze  
That's where you shine  
When there's nothing but no  
And there's no where to go you find away  
That's where you shine

Yes, shine  
Shine, shine  
Oh, that's where you shine
