

A Little More Us

Stereo Skyline

Just a little more
Just a little more
Just a little more
Just a little more All this time trying to make you mine
Steals my lines, makes it hard to rhyme
But days go by like the summertime
The heat and this beat
Oh, it's everything and all you need A little more rock, a little less roll
A little more new, a little less old
A little bit of faith, a little bit a trust
A little bit of never giving up
A little bit of you, a little bit of me
A little less them, a lot more we
Just a little more us
Just a little more us tonight Close my eyes, dying to make a wish
To cross your kiss off my bucket list
Here's the break with the 808, you'll see
Baby, that I'm everything and all you need A little more rock, a little less roll
A little more new, a little less old
A little bit of faith, a little bit a trust
A little bit of never giving up A little bit of you, a little bit of me
A little less them, a lot more we
Just a little more us
Just a little more us tonight
You're all my dreams
Makes me insane that you're not mine yet
I'll take you to school
I wanna teach you exactly how I do Just a little more
Just a little more A little more rock, a little less roll
A little more new, a little less old
A little bit of faith, a little bit a trust
A little bit of never giving up A little bit of you, a little bit of me
A little less them, a lot more we
Just a little more us A little more rock, a little less roll
A little more new, a little less old
A little bit of faith, a little bit a trust
A little bit of never giving up A little bit of you, a little bit of me
A little less them, a lot more we
Just a little more us
Just a little more us
