

UR Town

WILLOW

[Intro]

My temple

My temple

[Verse 1]

I wanna hear your heart beat

The steady humming your merkaba spin

Everything, even thoughts about me

When I wake up in the morning time

I think about my past life

Was I with you or you with me?

We're living in a fantasy, babe it's all a dream

It's kinda hard to see

You need the heart to see

You need the heart to see, oh see

[Chorus]

What's going down in your town? I

I'm riding 'round in the night

My body is moving, I'm tryna get groovin', yeah

What's going down in your head? I

I'm riding 'round in the night

I'm tryna get groovin', let's go to the beach and jump in

[Verse 2]

Oh they trusted her and she tried to be

Everything that they want her to

But she had to see what she could do

And all the things that she would also

Tell me one thing

Is it really bad to have experience?

Then you know for yourself

Rather than sit home and believe in this

They said, "Willow don't touch that"

I looked and walked and then I went and touched it

They said, "Don't walk fast"

I took off running and was not near stopping

[Chorus]

What's going down in your town? I

I'm riding 'round in the night

My body is moving, I'm tryna get groovin', yeah

What's going down in your town? I

I'm riding 'round

I'm gonna go, baby, the frequency

You wanna roll with me

[Bridge]

Broken

Two shards that fit together

Hoping

More come together

To make a piece of art

Bigger than anything we could imagine

To make a piece of art

That's raising the whole vibration of gaia

Going right back to the ropes

[Chorus]

What's going down in your town? I

I'm riding 'round in the night

My body is moving, I'm tryna get groovin', yeah
