

Bring Me the Night (feat. Kina Grannis)

[Sam Tsui](#)

Measuring days in the spaces between our goodbyes
Learning to wait through the endless parade
Of our same old see-you-next-time's
But when I close my eyes, the miles melt away
Like you're here in my arms at the end of the day
So bring me the night, send out the stars
Cause when I'm dreaming we don't seem so far
Darken the sky, and light up the moon
So that somehow you'll be here with me soon
Bring me the night
Bring me the night
That brings me to you
You swear I don't know if the days are as slow as they seem
Wondering when you'll be with me again
and this finally can be more than just a dream
But when I close my eyes, I want only to stay
Where the farthest you are is a heartbeat away
So bring me the night, send out the stars
Cause when I'm dreaming we don't seem so far
Darken the sky, and light up the moon
So that somehow you'll be here with me soon
Bring me the night
Bring me the night
That brings me to you
And it's enough, knowing you are calling to me
While we're dreaming beneath the same moon
All it takes is imagining you so that I can get through
One more long and lonely day
So bring the night, tell me it's near
Give me the chance to pretend to you're here
Darken the sky and light up the moon,
Please bring it soon
So bring me the night, send out the stars
Cause when I'm dreaming we don't seem so far
Darken the sky, and light up the moon
So that somehow you'll be here with me soon
Bring me the night,
Bring me the night,
Bring me the night,
Bring me the night
That brings me to you
