

I Got You

Amy Shark

If we don't do this today
There goes a day
Another a moment that could have been ours
We'll figure it out
That's what I do
You know I got you
You know I got you Everyone's stopped just to watch us walk out on the balcony
Stare at your lips in the light of the scariest movies
There is not many chances in life I can make this happen with you
Pulling me close every time,
Would you just come and kiss me already
Just kiss me, just kiss me
If we don't do this today
There goes a day
Another a moment that could have been ours
We'll figure it out
That's what I do
You know I got you
You know I got you You keep me up all night
I hope you stay this crazy about me
For the rest of our lives
Blankets on beaches and I could keep teaching you
We know our special disease
Out of my mind, knew the other you with
We're getting close every time
Would you just let it happen already
Just go with it, just go with it
If we don't do this today
There goes a day
Another a moment that could have been ours
We'll figure it out
That's what I do
You know I got you If we don't do this today
There goes a day
Another a moment that could have been ours
We'll figure it out
That's what I do
You know I got you
You know I got you
You know I got you
You know I got you
