

# In Your Love

## Tyler Childers

I will wait for you  
Til the sun turns into ashes  
And bows down to the moon  
I will wait for you

It's a long hard war  
Ah, but I can grin and bare it  
'Cause I know what the hell I'm fighting for  
And I will wait for you

We were never made to run forever  
We were just meant to go long enough  
To find what we were chasing after  
I believe I found it here in your love

I will stand my ground  
I'm a bad man looking for takers  
You're the finest thing around  
So I will stand my ground

'Cause it's cold out there  
And you know some men search for ages  
For the love that I have found  
So I will stand my ground

We were never made to run forever  
We were just meant to go long enough  
To find what we were chasing after  
I believe I found it here in your love

Honey, I will wait for you  
Honey, I will stand my ground

I will work for you  
Til my hands are tired and bleeding  
I know what it is from us I'm needing  
I will work for you

Like a team of mules  
Pulling Hell off from its hinges  
It's the love that I'll keep tending  
I will work for you

We were never made to run forever  
We were just meant to go long enough  
To find what we were chasing after  
I believe I found it here in your love

Honey, I will wait for you  
Honey, I will stand my ground  
I will work for you  
I will stand my ground
