

# First Love

## Goapele

As summer was ending, you were walking in  
It seemed my life was falling  
But in this season we were friends  
Six days into spring is where our story begins  
You didn't rush a thing  
But you knew you would win I never thought you'd be the only one  
I dreamt of fairy tales, that's how we begun  
But I was waiting for some magical moment  
That would prove to me, forever would be fine  
Meanwhile my first love was standing first in line  
One of the first times I didn't feel alone  
Is when I was in your arms, you always made me feel at home  
We watched the sunrise 'cause the night had slipped away  
And from then until now, we've been through some different phases  
But you love the winter, love the challenge  
Always managed to think that we would make it I never thought you'd be the only one  
I dreamt of fairy tales, that's how we begun  
But I was waiting for some magical moment  
That would prove to me, forever would be fine  
Meanwhile my first love was standing first in line So let me get used to things 'cause Gradual's  
my name  
I don't dive into the cold, I get in slow but every day  
I'm making peace with loving you, peace with being me  
Any, any pieces of us, I claim them all today  
I never thought you'd be the only one  
I dreamt of fairy tales, that's how we begun  
But I was waiting for some magical moment  
That would prove to me, forever would be fine  
Meanwhile my first love was standing first in line Standing first in line  
Standing, standing
