

# U

## H.E.R.

right now my head is a mess, thinking bout' you got me stressed,  
but you could probably care less, you're just so hard to impress,  
everytime that we go oout, you do something to show oout,  
played the fool, but I know now  
I always worry bout' you, I only tell you the truth  
I'm not like those other girls, I don't be acting brand new  
everytime that we go oout, you do something to show oout,  
played the fool, but I know now  
it could be u s, there's so many letters but it's only U  
only U, only only only u, only u  
my friends say you not about me, I wasn't trying to believe in  
I'm always holding you down, even tho you mess around  
you ain't showing me no love, you just want me too show off  
played the food but I know now  
it could be u, there's so many letters but it's only U  
only U, only only only u, only u  
it could be u s, there's so many letters but it's only U  
only U, only only only u, only u  
boy I wish that you would see this could be us,  
ooh I'm so tired of you taking advantage of love  
it could be u s, there's so many letters but it's only U  
only U, only only only u, only u  
it could be u s, there's so many letters but it's only U  
only U, only only only u, only u
