

# Name On It

Chris Janson

Honey have you been outside  
Its getting down to around 65  
Its like Georgia knew you loved those California kind of nights  
And that spot you like downtown  
Its got the band, i know you love  
And I've got your favorite playlist all queued up So baby count to ten then meet me in the  
driveway  
Slide under my right arm, we'll head down that highway  
Girl we've got forever, we don't have to wait on it  
Stars are in align in the sky and its a perfect night  
Girl its got your name on it  
This night has got your name on it  
I got a coozie waiting on ya  
Six pack of mic ultra light  
I got a half of empty bed sheet laid back just the way you like  
I got 2 hard working hands and I've got these miss you lips  
There only made to hold you, here for you to kiss Baby count to ten then meet me in the  
driveway  
Slide under my right arm, we'll head down that highway  
Girl we've got forever, we don't have to wait on it  
Stars are in align in the sky and its a perfect night  
Girl its got your name on it  
This night has got your name on it Yeah its got your name on it  
Yeah girl you were made for it  
And I've got the time of your life  
Dolled up so come on push play on it  
Baby count to ten then meet me in the driveway  
Slide under my right arm, we'll head down that highway  
Girl we've got forever, we don't have to wait on it  
Stars are in align in the sky and its a perfect night  
Girl its got your name on it  
This night has got your name on it  
Girl its got your name on it  
Oh this night has got your name on it
