

Slow Down

Normani, Calvin Harris

Oh, oh
Everybody slow down
Everybody, everybody slow down
Everybody be on the low down
And it's cool if you wanna be slow, no, no doubt
Remember that night at your old house?
Remember that time when you broke down?
Seeing that you're happy, that you dropped that chain
No I'm not, I'm not the one to hold down Champagne, I took all your clothes off
Champagne, and your calling other girls out
And I'm making it high like a soldier
And you're making me take my clothes off
I still don't get it, I'm stealing your time
But I still feel your heart, on my skin
Could you just be real?
Don't be scared to feel this
We can make the world go spin
Could you let me feel this?
You can risk it, but I'll be here
I can make your lonely disappear right
I could, could you just be real?
Could you just be real? Ain't nobody home now
Ain't nobody, ain't nobody home now
Everybody be on that night life flow
When I exit the club, so they putting on a show now, roll down
I ain't tryna move like a dummy
I'm tryna move real so you trust me
I'm tryna show you that other people try
But it's better when you touch me
Champagne, I took all your clothes off
Champagne, and I'm missing all my phone calls
Somebody in your bed like, be like
Fucking you to a slow jam, I'm rocking your phone now
I still don't get it, I'm stealing your time
But I still feel your heart, on my skin Could you just be real?
Don't be scared to feel this
We can make the world go spin
Could you let me feel this?
You can risk it, but I'll be here
I can make your lonely disappear right
I could, could you just be real?
Could you just be real? Could you just be real?

Real, real
Could you just be real?
Could you just be, could you just be
