

# When Can We

KYLE

[Intro]

So when can we fall in love again?  
So when can we maybe be friends, yeah?  
When can we fall in love again?  
When can we? So when can we?

[Verse 1]

She's so into getting faded, she's so into getting drunk  
She's so into money, diamonds, and all the things that she wants  
She's so into getting wasted, she's so into getting high  
She's so into every weekend, and hanging with random guys  
She's so into shopping splurges and hanging out at the mall  
She's so into saying "fuck it" and taking her parents' car  
She's so into college parties, she's so into hanging out  
She's so into being into, but that's what life's all about

[Chorus]

So when can we fall in love again?  
When can we maybe be friends, yeah?  
When can we fall in love again?  
When can we? Oh baby, when can we?

[Verse 2]

She's so into being social, she's so into ditching class  
She's so into wearing spandex that show off her perfect ass  
She's so into flunking high school, she's so into giving up  
She's so into letting the world know she doesn't give a fuck

[Bridge]

She's so easy to believe  
And nine out of ten, she'll leave you for her friends, yeah  
One day you'll understand me for all that I am  
And I'll make you you again

[Chorus]

So when can we fall in love again?  
When can we maybe be friends, yeah?  
When can we fall in love again?  
When can we? Oh baby, when can we?  
So when can we fall in love again?

When can we maybe be friends, yeah?  
When can we fall in love again?  
When can we? Oh baby, when can we?

[Bridge]

When can we? Love again?  
When can we? Love again?  
When can we? Love again?  
When can we? Love again?  
When can we? Love again?  
When can we? Love again?  
When can we? Love again?  
When can we? Love again?

[Chorus]

So when can we fall in love again?  
When can we maybe be friends, yeah?  
When can we fall in love again?  
When can we? Oh baby, when can we?

[Outro]

She's so easy to believe  
And nine out of ten, she'll leave you for her friends, yeah  
One day you'll understand me for all that I am  
And I'll make you you again
