

Chemistry

Stereo Skyline

Oh Oh Oh
Yeah what's the chance of you and me
The two of us in a make believe 3D movie
Let's subtract the math and talk about chemistry She still counts on her fingers sometimes
But she looks oh so fine by my side
Well isn't she something
I just can't stop humming
No And maybe girl you rock my world
Flip turn it upside down and inside out
Feeling just fine like we should alright
Rolling out of bed just to do it all again
Grab my shoes and walk right out the door
Girl i couldn't ask for more
Oh oh oh
Let's forget about math and history
The milky way the galaxy
The gravity that's pulling you like glue
Right towards me And maybe girl you rock my world
Flip turn it upside down and inside out
Feeling just fine like we should alright Rolling out of bed just to do it all again
Grab my shoes and walk right out the door
Girl i couldn't ask for more Gravity keeps happening
To disappear when you are near
You seem to be what's making me
Miss a beat Maybe girl you rock my world
Flip turn it upside down and inside out
Maybe girl you rock my world
Flip turn it upside down and inside out
Feeling just fine like we should alright
Rolling out of bed just to do it all again Maybe girl you rock my world
Flip turn it upside down and inside out
Feeling just fine like we should alright
Rolling out of bed just to do it all again
Grab my shoes and walk right out the door
Yeah girl i couldn't ask for more
