

Constitution (feat. Bryson Gray)

Burden

They after the constitution, it's time for your contribution
Patriots come to save the home of the brave and then never stop the movement
Where we are, who we fight, every star, every stripe
Damned if we be the land of the free, with someone controlling our life

This for the people don't get it
I'm more than happy to teach
They start with the first amendment, they want your freedom of speech
Either which way that you spit it
We should be able to speak
I disagree so I'm speaking my mind and now they been trying to take it from me
People like me all we have is a voice that you wanna silence
It's from the silent majority, so many more than me
2 middle fingers to Biden
Matter of fact, lemme make that a that a post
Would but the fact checkers said no
Hot damn, I done got banned on TikTok just for telling a joke
They want us defenseless
Attacking the 2nd amendment
We want the right to bear arms, they want us fighting with bare paws
And now you can't say what you want to
It was all games when it wasn't you
You ain't safe from this
You got bait and switched
We all the same, what you gon do?
Stop poisoning the foundation
Making everything sound racist
Founding fathers vowed to never change it
It's not the gun, it's the person that aims it
Thy to take the right's that I'm claiming
Never liked my voice but I'm famous
I'ma tell the truth 'cause I'm shameless
So you know it's true when I say this

They after the constitution, it's time for your contribution
Patriots come to save the home of the brave and then never stop the movement
Where we are, who we fight, every star, every stripe
Damned if we be the land of the free, with someone controlling our life
They after the constitution
They after the constitution
(I guess it's time to buy another gun, then buy another gun, then buy another gun)
They after the constitution
They after the constitution

(Hold up, let me load up, 'fore they roll up. what you expect us to run?!)

They hate me but I'm (?)

I thought we had free speech but they keep banning my words from everywhere
Tiktok, IG but watch me buy another gun, can't stop me, that's my right to ID I might give my
love

So don't try me

And I know I gotta lot of patriots behind me
I don't care about a job or money, it means nothing
Never have to give up my rights, no discussion
And you know it's time to fight I bluffing
Told y'all that the patriots up to something
Biden wants us to wear a mask, get the vaccine card

Y'all (?) get to vote (?)

Then we stormed the capital like it ain't ours
Ain't 'bout to tone down nothing, I'ma go hard
All these racists like "we the people" you're 76 and old senile racist
If we just gon back down, they just gon take it
This is America, look at how we became
Y'all using to sell murch and just be famous
When it's time to stand up, then you change it
Y'all like said they like my freedom
This red, white, blue flag? I'm gon hang it

They after the constitution, it's time for your contribution
Patriots come to save the home of the brave, then never stop the movement
Where we are, who we fight, every star, every stripe
Damned if be the land of the free, with someone controlling our life

They after the constitution

They after the constitution

(I guess it's time to buy another gun, then buy another gun, then buy another gun)

They after the constitution

They after the constitution

(Hold up, let me load up 'fore they roll up. What? You expect us to run?!)
